

Understanding the chemical & petrochemical industries

Access • Maintenance • Repair

ThyssenKrupp Xervon
Powering Plant Performance

ThyssenKrupp

The chemical and petrochemical industries require maintenance solutions for the future: **Integrated services – custom tailored**

Since October 1, 2005, there has been a new name for process industry services: **ThyssenKrupp Xervon.**

ThyssenKrupp Xervon GmbH, headquartered in Duesseldorf, Germany, has emerged through the merger of the internationally operating PeinigerRöRo Group and ThyssenKrupp Plant Services. The outcome of the alliance is one of the biggest international services providers for the process industry.

We perceive ourselves as integrated maintenance providers with a broad spectrum of services for your (petro)chemical locations – flexibly tailored to your specific requirements. And always with a focus on maximum plant availability and always with a view to protecting your property, plant, and profits; your employees and the environment. In assuming responsibility for your maintenance chores we are triggering a sustained enhancement process: Powering Plant Performance.

Whether it's scaffolding, corrosion protection or any other specialist service, our management team control and monitor every aspect of the operation, from the consultancy stage through planning, costing and implementation to long-term downstream support.

The broad spectrum of our services and the smooth interfacing of the various divisions form the basis of our flexibility. In order to best exploit the resulting synergies, we arrange for you to have just one contact on each project, accompanying you from conception to completion. The time and expense involved in erection, maintenance or repair of complex plants and buildings are drastically cut. Our fine-tuning of individual jobs and the integration and coordination of downstream work stages avert the possibility of interface friction.

Responsiveness, flexibility, quality and reliability are what we offer our customers, nationally and internationally. A newly formed, clearly structured and powerfully positioned process industry services company: ThyssenKrupp Xervon.

One for all.

We offer you a whole range of industrial services, individually or integrated for project, outage and maintenance contracts of any scale:

Scaffolding

- Design, supply, erection

Corrosion protection

- Surface preparation
 - abrasive blasting
 - mechanical tooling
 - high-pressure cleaning
 - hazardous coating removal
- Industrial coatings
 - airless spraying, e.g. epoxies, urethanes, silicates, coal tars, mastics
 - conventional painting, low-pressure spray applications, specialized brush applied coating
 - trowel-applied solvent-free epoxies and mastics

- Passive fire protection
 - Airless spray and trowel of epoxy mastics
 - Cement-based fire proofing works

Insulation

- Hot, cold, acoustic or fire protection

Concrete repair

- Industrial and other floorings/ plastic coating for drinking water
- Waterproofing
- Decontamination/depollution
- Development of customized maintenance systems

Call us if you need to know more about us and our services!
Competent specialists are available at any time to inform and advise you comprehensively and individually.

Your success is our benchmark!
